12/24V Electronic module for all Danfoss BD35 and BD50 Compressors.
For all Isotherm units since 1998, connects to the compressor with three pins.

Tech tip: to test this module, put a jumper between the T (Thermostat) and C (Compressor) terminals. The compressor should start and run at low speed. If the compressor doesn't start, you may need to replace this module. We can test the module for you here, please call for details.

Danfoss part number #101N0210, Frigoboat part E50895.

Case size: 2 5/8" x 4 1/8" x 1 3/4"

INDEL Part #SEG00002DA
